

Two Updated best sellers for 2021

02.

Caboche

The Caboche family has been renewed both from a technological point of view, optimizing the led use on the whole collection, and from an aesthetic one.

The new zig zag shape of the internal structure allows for the maximum possible light diffusion, the new mounting system for the spheres, with a twist-lock, is simpler, more stable and offers higher transparency. In the medium and large suspension versions, the glass concave diffuser has been replaced by a more contemporary PMMA frosted one. The elegant new grey colour replaces the yellow gold one in the spheres..

The new grey version offers a richer feel with a slightly more diffused light. We are keeping a hybrid **halogen version** for the media suspension in the 2021 price list. This has the new frame and spheres but has the old R7 lamp holder and glass diffuser. This model will be phased out at the end of 2021.

01.

Twiggy

The Twiggy family is enriched by the new model Elle, characterized by a longer stem that allows for a wider outreach and for a consequent possibility of use in new functions.

Twiggy Elle, is a new dimension having a longer reach, so ideal for positioning above a dining table. The lamp also has a new led technology, that guarantees a higher light efficiency and colour rendering. The light source is no longer hidden by a prismatic diffuser, but it is contained in a more contemporary PMMA shell that offers a very high visual comfort.

This same technology has been applied to the standard Twiggy LED floor.

Twiggy wood and Twiggy Elle, are available only in LED versions

Last but not least, we have introduced a new **graphite** finish.
